

THE GLOBAL APPROACH

To Semiconductor Sourcing

INTRODUCTION

With total sales eclipsing \$466 billion in 2020 alone¹, the semiconductor industry is truly global. And as manufacturers worldwide ramp up production², companies in the aerospace and defense industries need a procurement partner that can help them access that global inventory — a partner like A2 Global.

HOW WE GUARANTEE QUALITY

Global Presence

Spread throughout North America, Europe, and Asia, our network of 18 offices and distribution centers gives us direct access to the world's components, getting you what you need faster.

Global Support

Our international customer service team offers round-the-clock availability, as well as an intimate understanding of local import/export laws, customs, and challenges.

Global Awareness

The benefits of international supply centers go beyond inventory: Our expansive presence keeps us up to date on emerging shortages and disruptions — and helps you strategize your procurement efforts.

Global Relationships

A2 Global nurtures connections with qualified regional suppliers. When coupled with our exclusive quality control processes, working with our trusted partners ensures the seamless delivery of quality products.

GLOBAL LOCATION MAP
